DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention I, Claims 1-6, in the reply filed on 3 October 2005 is acknowledged. Claims 7-8 previously drawn to non-elected inventions have been cancelled.

Drawings

The drawings are objected to because

In Fig. 4 the element "pivot arm 110" of paragraph 0031 appears to be improperly labeled.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

Art Unit: 3643

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 are rejected under 35 U.S.C. 102(b) as being anticipated by Stannard (US 4,522,618).

As to claim 1, Stannard discloses a an apparatus for forming a flower pot cover having an indented ring portion comprising a female die (all of Fig. 2 but 40,41, and 100) with an opening 24 of Fig. 1) and having a plurality of fingers (60, 61, 62, and 63 of Fig. 4); and, a male die (40, 41, and 100 of Fig. 2), the male die having a recess formed between the lower end and the upper end of the female die (inherent in Figs. 3 and 4) and adapted to receive the fingers of the female die to form the indented ring portion (from Figs. 3 and 4).

As to claim 4, Stannard further discloses each finger with an arcuate nub (tip portion of 60, 61, 62, and 63 of Fig. 4).

As to claim 5, Stannard further discloses the fingers uniformly spaced around the circumference of the female die (see Fig. 4).

As to claim 6, Stannard further discloses the arcuate nub of the fingers substantially circumscribing a circle when the nubs are positioned in the recess of the male die (implied from Fig. 4).

Allowable Subject Matter

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weder et al. ('473), Goodwin, and Barro disclose in the prior art various apparatuses.
